Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over N. Zaki et al of record on 1449.

The reference discloses a condensation reaction of one mole of alkyl phenol(nonyl or dodecyl), 1.2 mole p-formaldehyde and one mole polyalkylenepolyamine to form polyalkylphenols-polyalkylenepolyamines-formaldehyde products (see page 12, 2.1.1 Condensation and in Table 1).

The reference further discloses said products with alkylene oxides such as polyethylene oxide to form the final product.(see page 13, 2.1.2.ethoxylation).

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed molar equivalent of formaldehyde nor alkylene oxides to form the product of the claimed formula in claim 9.

However, the reference does disclose the requirements to form the product, an alkoxylated alkylphenol-formaldehyde-diamine polymers and their use as de-emulsifiers for water-in-crude oil emulsions. Therefore, it would have been obvious to one of ordinary skill in the art to modify the molar equivalent of formaldehyde and alkylene oxides from the reference within the limitations of the instant claims to form the products

of the claimed formula since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said modification.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
